

R U R A L Ready for A Life-change A Handbook for Small Landholders

- Ever wished your property came with a handbook or an instruction book explaining some of the more important differences between suburban living and living in a rural or semi-rural location?
- Wondered if you were cut out to own and care for livestock and what your legal and moral obligations might be?
- Considered purchasing a tractor or ride-on mower but have no idea what all the different features are for?
- Need to purchase a chainsaw, but don't know what size is best?
- What are the dangers (if any) of the additional wildlife you will come in contact with in a rural setting?

These questions and many more have been answered in a friendly and informative approach by first time author *Bernie Webb*. *Bernie* and his wife *Hazel* moved to a special-rural area of Perth WA over 20 years ago, with virtually no inkling of the additional knowledge they would have to quickly acquire, to enable them to successfully adapt to their new rural environment.

Bernie has run his small business, 'Redgum Rural Services' since 1994 and has been an active member of the local 'Volunteer Bush Fire Brigade' for over 20 years. This, together with firsthand involvement with his own special-rural property, has given him plenty of experience to draw from.

Realising that most people making this move will also have the same problems to solve, *Bernie* has not only written but completely designed, edited and self-published a very practical and informative book.

'**R U R A L**' is squarely aimed at people moving, or already moved from suburbia to a rural area. The book is liberally illustrated throughout with over 160 photographs (mostly taken by *Bernie*) as well as a number of explanatory tables and diagrams.

Summarised in *Bernie's* own words; -
"...a book that I wish we could have referred to 20 years ago".

**Thinking of making a tree-change?
Moving from suburbia to a rural area?
Presently reside in a rural area?**

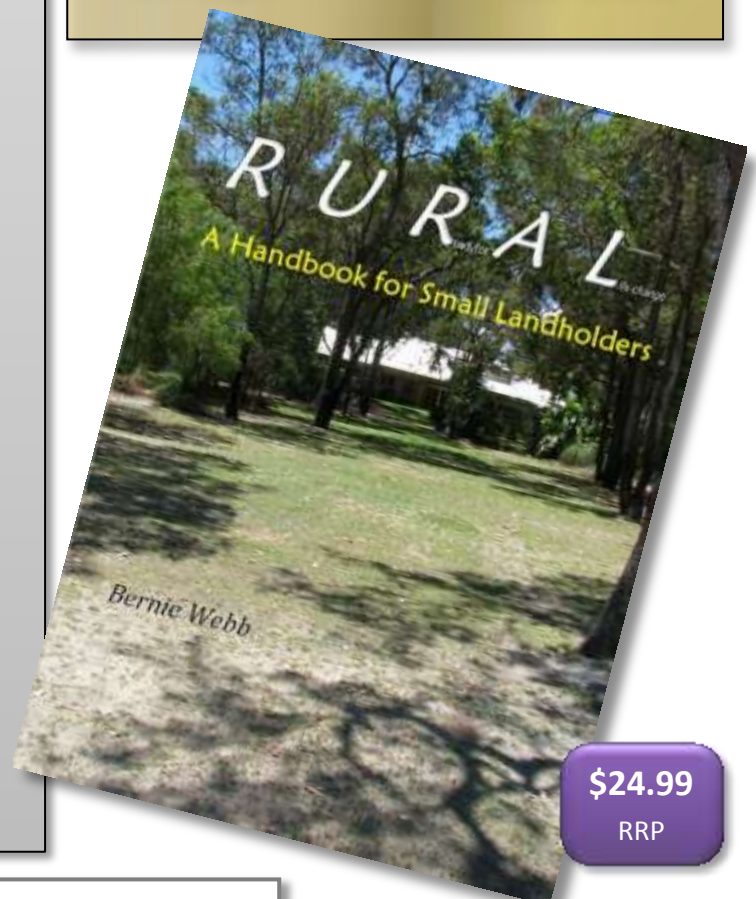

What do you know about:-

- **What tools and machinery are required**
